

KALDEWEI

Europe's No. 1 for baths

THE SMOOTH-WALLED BATH.

With the Kaldewei Waterfall Bath Inlet and Geberit PushControl bathtub drain.

PURO

PURIST DESIGN. EXCELLENT COMFORT. THE COMPLETELY SMOOTH-WALLED BATH.

This is comfortable bathing at its finest: now bathers can lie back and relax in the water without any obtrusive elements disrupting the smooth surface of the walls or the purist design. This is made possible by the Kaldewei Waterfall Bath Inlet and the Geberit PushControl bathtub drain, both of which lie flush against the inside of the bath, with nothing to interrupt the clean lines. The dream of the smooth-walled bath has just become a reality.

THE KALDEWEI WATERFALL BATH INLET.

Something for those who enjoy bathing: the very special experience of the Kaldewei Waterfall Bath Inlet. When the tap is turned on, the inlet opens and a steady waterfall cascades into the bath. Not only does the Waterfall Bath Inlet create a calm and harmonious atmosphere, this elegant cover is also integrated flush with the surface of the bath's inner wall. A wonderfully simple solution that meets the highest design standards.

THE GEBERIT PUSHCONTROL BATHTUB DRAIN.

The PushControl bathtub drain from Geberit is the ideal complement to the Kaldewei Waterfall Bath Inlet. With no protruding parts to disturb bathing pleasure, the PushControl offers ideal conditions for comfortable, relaxed bathing. Added to this is the extraordinary operating concept: just a push of the button opens and closes the drain.

THE SMOOTH-WALLED BATH IS AVAILABLE FOR THE FOLLOWING BATH FAMILIES:
